Experience

Backend Developer   **Teknova Company** (Jul 2025 – Present)

- Built and maintained RESTful APIs with Laravel.
- Developed BackPack dashboards for data management.
- Tested APIs across various scenarios to ensure reliability and performance.
- Collaborated in designing and deploying microservices architecture leading to around 30% reduction in server response time.

Education

2022 – 2027   **Bachelor of Information Technology Engineering**

Damascus University

Skills and Tools

- **Backend Development**
  Laravel, RESTful APIs, Clean Architecture, WebSockets, API Authentication (JWT, Sanctum), Caching, Queue Workers, API Testing, Debugging and Monitoring.
- **Database**
  MySQL, PostgreSQL, Redis.
- **Programming Languages**
  C++, PHP, C#, Java.
- **Deployment**
  Docker, Linux.
- **Version Control**
  Git, GitHub.
- **Soft Skills**
  Problem Solving and Competitive Programming, Research, Communication, Teamwork.

Projects

- **ZAD – Real Estate Management System (Teknova Company)**

  A real estate platform built using a microservices architecture. The system includes property listings, auctions, commercial offers, subscription plans, real-time chat, and building-materials handling. containerized with Docker, uses MySQL and Redis for storage and caching, and supports real-time communication via Laravel Reverb. Monitoring and logging are integrated using Prometheus, Grafana, and Loki.

  Technologies: Laravel, MySQL, Docker, Redis, Nginx, Prometheus, Grafana, Traefik gateway.

- **Learning Management System   (May 2025 - Aug 2025)**
  GitHub: https://github.com/ABDALRZAQ345/LMS
  A comprehensive educational platform focused on technology. It includes courses, structured learning paths, a project showcase, quizzes, certifications, programming contests, ranking system, AI Agent and more.

  Technologies: Laravel, MySQL, Firebase, Docker, Swagger, AI Agent (built by n8n).

- **E-Commerce System (Dec 2024 – Feb 2025)**
  GitHub: https://github.com/ABDALRZAQ345/E-Commerce-System
  A full-featured e-commerce platform that supports multiple stores, product listings, smart search, customer reviews, Wishlist, and online payment integration.

  Technologies: Laravel, MySQL, JWT, Sanctum and Firebase Notifications.

- **Habit tracker Application (Mar 2025 – Apr 2025)**

  GitHub: https://github.com/ABDALRZAQ345/Monumental_Habits
  A habit-tracking application that allows users to create daily, weekly, or custom-timed habits, monitor their progress, view insightful statistics and real time chat.

  Technologies: Laravel, MySQL, PostgreSQL, Reverb (Real Time) .

Achievements

- **Tester:** Participated as a tester for the Latakia University Official Programming Contest.
- **Contestant:** Participated as a contestant in Damascus University Official Programming Contest (7th place - Bronze medal).

Languages

English   **Arabic**
